Summary

Backend developer with 3 years of experience building scalable microservices using Java 8+ and Spring Boot, with strong foundation in REST and GraphQL APIs, system design, and Agile delivery.

Technical Skills

Languages: Java 8+ , Go (Golang), HTML, CSS, JavaScript
Backend Frameworks & Testing Tools: Spring Boot, Spring MVC, Spring Security, Hibernate, JPA, REST, GraphQL, JUnit, Mockito, Swagger, Apache Kafka
AI Tools & Cloud Platforms: AI Agents, Claude, GitHub Copilot, Augment, Cursor, AWS, GCP
Developer Tools: Git, Maven, GitHub, GitLab, Docker, Postman, Splunk, Jenkins, JIRA
Software Engineering Concepts: OOPS, DSA, SOLID, Microservices
Data Formats & Databases: SQL, Redis, XML, JSON
Operating Systems: Ubuntu, Windows, macOS

Education

GuruNanak Institute of Technology

B.Tech in Information Technology, DGPA-9.32

Aug 2019 — June 2023

Kolkata, India

Experience

Persistent Systems

Sep 2025 – Present

Senior Software Engineer

Hyderabad, India

- Improved application resiliency by resolving production incidents using **Splunk** and **AI-assisted debugging tools**, accelerating root-cause analysis by **40%** and reducing mean downtime.
- Designed and developed **scalable distributed microservices** handling high-volume API traffic, reducing average response time through query optimization and efficient inter-service communication.
- Worked with **CI/CD pipelines** using Jenkins for automated build, test, and deployment workflows, gaining hands-on exposure to enterprise-level release processes.
- Developed **unit and integration tests** using JUnit and Mockito, increasing test coverage by **60%** and significantly reducing production defects.
- Containerized microservices using **Docker**, ensuring environment consistency across development, staging, and production deployments.

Persistent Systems

Sep 2023 – Sep 2025

Software Engineer

Pune, India

- Developed and maintained **RESTful APIs** using Spring Boot, Hibernate, and JPA, supporting enterprise-grade applications used by thousands of users.
- Implemented **role-based authentication and authorization** using Spring Security and JWT, securing access across multiple application services.
- Optimized **MySQL queries** by introducing indexing and rewriting N+1 queries, resulting in measurably faster API response times.

Projects

Intuit QuickBooks Application

Dec 2023 – Present

- Developed and maintained **RESTful APIs** for **third-party integrations** in QuickBooks, enabling seamless data exchange between external services and the core platform.
- Debugged and resolved **integration issues** across third-party API contracts, identifying root causes using Splunk and reducing recurring failure rates.
- Automated workflows using **Cron jobs** and contributed across the **SDLC** in an Agile environment using JIRA.

BlogPost Application (GitHub)

Oct 2023 – Nov 2023

- Developed a **blogging platform** supporting post creation, editing, and deletion with **like/dislike**, comments, and follow/unfollow features.
- Integrated **Kafka** for asynchronous processing to improve system scalability and performance.

Certifications

AWS Certified Cloud Practitioner
AWS Certified AI Practitioner
GCP Associate Cloud Engineer
